PATHFINDER:

APPLIED LINGUISTICS

www.library.usc.edu.ph

August 2014

Introduction

A Pathfinder is a guide to the literature and resources in a particular subject area. It is a subject-oriented research guide designed to encourage researchers a self-directed use of the library.

The Humanities Section provides pathfinders basically to support students and faculty in their search for recorded literature and resources available at the USC Library System and accessible on the Net.

Should you have comments, questions and suggestions on this pathfinder, please contact the Humanities Section at local 266.

Key Term: **Applied Linguistics**

Scope Note: Applied Linguistics (AL) is a technology which makes abstract ideas and research findings accessible and relevant to the real world; it mediates between theory and practice. The quest of knowledge characteristic of established academic disciplines is vitally important, in part because all furtherance of our understanding of the world we live in is worthwhile in itself; but it is also crucial that the understanding gained in the quest for "pure" knowledge be somehow related to everyday human experience. (Source: *International Encyclopedia of Linguistics* v1. William Bright, Editor-in-Chief. Oxford: Oxford University Press. c1992.)

Broader Term:

- Linguistics

Narrower Term:

- Computational linguistics
- Language services
- Mathematical linguistics
